

LOGO DESIGN FUNDAMENTALS

FULL VISUAL STUDY MANUAL

Course Code	EDA-LDF-123
Level	Beginner to Intermediate
Duration	6 Weeks (19 Lessons)
Certificate	Professional Certificate in Logo Design Fundamentals
Prerequisite	Graphic Design Fundamentals recommended
Learning Format	Concept Development + Vector Practicals + Final Logo System Project

Originality standard: create original concepts. Do not trace, copy or closely imitate protected logos, trademarks or commercial artwork. For real commercial adoption, appropriate trademark, name and domain checks remain necessary.

Course Introduction

Logo Design Fundamentals teaches the complete beginner-to-intermediate process of developing an original logo system: discovery, research, concept generation, shape and typography decisions, vector construction, colour, variants, testing, usage rules and professional handoff.

Learning Objectives

- Interpret a logo design brief.
- Distinguish major logo types.
- Generate original concepts through structured sketching.
- Construct simple vector marks.
- Select appropriate typography and colour.
- Build responsive logo variants.
- Define clear-space and minimum-size rules.
- Test logos in realistic contexts.
- Prepare an organised professional logo handoff.

Course Structure

1. Lesson 1: Introduction to Logo Design
2. Lesson 2: Brand Brief and Logo Research
3. Lesson 3: Logo Types and Visual Categories
4. Lesson 4: Concept Development and Keyword Mapping
5. Lesson 5: Thumbnail Sketching and Idea Generation
6. Lesson 6: Shape Language and Symbolism
7. Lesson 7: Vector Construction and Geometric Forms
8. Lesson 8: Typography in Logo Design
9. Lesson 9: Colour in Logo Design
10. Lesson 10: Negative Space and Visual Simplicity
11. Lesson 11: Proportion, Balance and Alignment
12. Lesson 12: Creating a Primary Logo
13. Lesson 13: Building Secondary and Compact Variants
14. Lesson 14: Monochrome, Reverse and Colour Versions
15. Lesson 15: Clear Space and Minimum Size Rules
16. Lesson 16: Testing Logos Across Real Applications
17. Lesson 17: Common Logo Design Mistakes and Critique
18. Lesson 18: Logo File Preparation and Professional Handoff
19. Lesson 19: Final Original Logo System Project

Lesson 1: Introduction to Logo Design

Introduction

Introduction to Logo Design develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of introduction to logo design.
- Complete a guided practical for introduction to logo design.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 1: Original instructional visual for Introduction to Logo Design.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of introduction to logo design when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

20. What is the main purpose of introduction to logo design?
21. State two professional logo practices from this lesson.
22. What originality or usability mistake should be avoided?
23. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 1 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 2: Brand Brief and Logo Research

Introduction

Brand Brief and Logo Research develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of brand brief and logo research.
- Complete a guided practical for brand brief and logo research.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Research the organisation, audience and category before sketching.

Logo principle: Review competitors to understand conventions, not to copy them.

Logo principle: Write keywords that express desired personality and position.

Logo principle: Identify required logo applications and size constraints.

Logo principle: Record intellectual-property risks and avoid confusing similarity.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of brand brief and logo research when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

24. What is the main purpose of brand brief and logo research?
25. State two professional logo practices from this lesson.
26. What originality or usability mistake should be avoided?
27. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 2 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 3: Logo Types and Visual Categories

Introduction

Logo Types and Visual Categories develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of logo types and visual categories.
- Complete a guided practical for logo types and visual categories.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 3: Original instructional visual for Logo Types and Visual Categories.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of logo types and visual categories when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

28. What is the main purpose of logo types and visual categories?
29. State two professional logo practices from this lesson.
30. What originality or usability mistake should be avoided?
31. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 3 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 4: Concept Development and Keyword Mapping

Introduction

Concept Development and Keyword Mapping develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of concept development and keyword mapping.
- Complete a guided practical for concept development and keyword mapping.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of concept development and keyword mapping when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

32. What is the main purpose of concept development and keyword mapping?

33. State two professional logo practices from this lesson.
34. What originality or usability mistake should be avoided?
35. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 4 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 5: Thumbnail Sketching and Idea Generation

Introduction

Thumbnail Sketching and Idea Generation develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of thumbnail sketching and idea generation.
- Complete a guided practical for thumbnail sketching and idea generation.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 5: Original instructional visual for Thumbnail Sketching and Idea Generation.
Ethan Digital Academy | EDA-LDF-123 | Paid Enrollee Visual Study Manual

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of thumbnail sketching and idea generation when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

36. What is the main purpose of thumbnail sketching and idea generation?
37. State two professional logo practices from this lesson.
38. What originality or usability mistake should be avoided?
39. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 5 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 6: Shape Language and Symbolism

Introduction

Shape Language and Symbolism develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of shape language and symbolism.
- Complete a guided practical for shape language and symbolism.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 6: Original instructional visual for Shape Language and Symbolism.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of shape language and symbolism when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

40. What is the main purpose of shape language and symbolism?
41. State two professional logo practices from this lesson.
42. What originality or usability mistake should be avoided?
43. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 6 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 7: Vector Construction and Geometric Forms

Introduction

Vector Construction and Geometric Forms develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of vector construction and geometric forms.
- Complete a guided practical for vector construction and geometric forms.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 7: Original instructional visual for Vector Construction and Geometric Forms.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of vector construction and geometric forms when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

44. What is the main purpose of vector construction and geometric forms?
45. State two professional logo practices from this lesson.
46. What originality or usability mistake should be avoided?
47. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 7 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 8: Typography in Logo Design

Introduction

Typography in Logo Design develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of typography in logo design.
- Complete a guided practical for typography in logo design.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 8: Original instructional visual for Typography in Logo Design.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of typography in logo design when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

48. What is the main purpose of typography in logo design?
49. State two professional logo practices from this lesson.
50. What originality or usability mistake should be avoided?
51. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 8 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 9: Colour in Logo Design

Introduction

Colour in Logo Design develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of colour in logo design.
- Complete a guided practical for colour in logo design.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 9: Original instructional visual for Colour in Logo Design.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of colour in logo design when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

52. What is the main purpose of colour in logo design?
53. State two professional logo practices from this lesson.
54. What originality or usability mistake should be avoided?
55. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 9 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 10: Negative Space and Visual Simplicity

Introduction

Negative Space and Visual Simplicity develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of negative space and visual simplicity.
- Complete a guided practical for negative space and visual simplicity.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of negative space and visual simplicity when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

56. What is the main purpose of negative space and visual simplicity?
57. State two professional logo practices from this lesson.
58. What originality or usability mistake should be avoided?

59. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 10 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 11: Proportion, Balance and Alignment

Introduction

Proportion, Balance and Alignment develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of proportion, balance and alignment.
- Complete a guided practical for proportion, balance and alignment.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of proportion, balance and alignment when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

60. What is the main purpose of proportion, balance and alignment?
61. State two professional logo practices from this lesson.
62. What originality or usability mistake should be avoided?
63. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 11 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 12: Creating a Primary Logo

Introduction

Creating a Primary Logo develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of creating a primary logo.
- Complete a guided practical for creating a primary logo.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of creating a primary logo when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

64. What is the main purpose of creating a primary logo?
65. State two professional logo practices from this lesson.
66. What originality or usability mistake should be avoided?
67. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 12 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 13: Building Secondary and Compact Variants

Introduction

Building Secondary and Compact Variants develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of building secondary and compact variants.
- Complete a guided practical for building secondary and compact variants.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 13: Original instructional visual for Building Secondary and Compact Variants.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of building secondary and compact variants when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

68. What is the main purpose of building secondary and compact variants?
69. State two professional logo practices from this lesson.
70. What originality or usability mistake should be avoided?
71. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 13 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 14: Monochrome, Reverse and Colour Versions

Introduction

Monochrome, Reverse and Colour Versions develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of monochrome, reverse and colour versions.
- Complete a guided practical for monochrome, reverse and colour versions.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of monochrome, reverse and colour versions when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

72. What is the main purpose of monochrome, reverse and colour versions?
73. State two professional logo practices from this lesson.

74. What originality or usability mistake should be avoided?

75. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 14 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 15: Clear Space and Minimum Size Rules

Introduction

Clear Space and Minimum Size Rules develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of clear space and minimum size rules.
- Complete a guided practical for clear space and minimum size rules.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 15: Original instructional visual for Clear Space and Minimum Size Rules.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of clear space and minimum size rules when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

76. What is the main purpose of clear space and minimum size rules?
77. State two professional logo practices from this lesson.
78. What originality or usability mistake should be avoided?
79. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 15 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 16: Testing Logos Across Real Applications

Introduction

Testing Logos Across Real Applications develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of testing logos across real applications.
- Complete a guided practical for testing logos across real applications.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Figure 16: Original instructional visual for Testing Logos Across Real Applications.
Ethan Digital Academy | EDA-LDF-123 | Paid Enrollee Visual Study Manual

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of testing logos across real applications when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

80. What is the main purpose of testing logos across real applications?
81. State two professional logo practices from this lesson.
82. What originality or usability mistake should be avoided?
83. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 16 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 17: Common Logo Design Mistakes and Critique

Introduction

Common Logo Design Mistakes and Critique develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of common logo design mistakes and critique.
- Complete a guided practical for common logo design mistakes and critique.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of common logo design mistakes and critique when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

84. What is the main purpose of common logo design mistakes and critique?

85. State two professional logo practices from this lesson.

86. What originality or usability mistake should be avoided?

87. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 17 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 18: Logo File Preparation and Professional Handoff

Introduction

Logo File Preparation and Professional Handoff develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of logo file preparation and professional handoff.
- Complete a guided practical for logo file preparation and professional handoff.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Keep editable vector masters.

Logo principle: Export appropriate scalable and raster formats for intended uses.

Logo principle: Use clear file names for primary, secondary, icon and monochrome versions.

Logo principle: Include a short usage guide.

Logo principle: Do not distribute third-party fonts or assets beyond their licence permissions.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of logo file preparation and professional handoff when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

88. What is the main purpose of logo file preparation and professional handoff?
89. State two professional logo practices from this lesson.
90. What originality or usability mistake should be avoided?
91. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 18 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Lesson 19: Final Original Logo System Project

Introduction

Final Original Logo System Project develops a specific part of the professional logo-design process. The focus is strategic originality, simplicity, scalability and reliable application rather than decorative effects.

Learning Objectives

- Explain the core principles of final original logo system project.
- Complete a guided practical for final original logo system project.
- Apply the lesson to an original education or business identity concept.

Teaching Content

Logo principle: Start with the brand purpose, audience and intended use.

Logo principle: Prefer a clear concept over unnecessary visual complexity.

Logo principle: Keep construction editable and scalable.

Logo principle: Test decisions at small size and in simple one-colour form.

Logo principle: Document approved choices so the logo can be used consistently.

Step-by-Step Guided Practical

1. Write the communication objective and three brand keywords.
2. Create at least four small original concept options.
3. Choose one option using the brief rather than decoration preference.
4. Build or refine it using simple editable vector forms and/or authorised typography.
5. Test it at small size, in one colour and on light/dark backgrounds.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the principles of final original logo system project when developing a new course or product identity while maintaining a clear relationship with the wider Academy brand.

Review Questions

92. What is the main purpose of final original logo system project?
93. State two professional logo practices from this lesson.
94. What originality or usability mistake should be avoided?
95. How would this lesson improve a logo used on both an app icon and a certificate?

Assignment

Complete the Lesson 19 exercise using an original fictional brand concept. Submit sketches or instructor-approved evidence, the refined design and a short rationale connecting the design to the brief.

Final Original Logo System Project - 100 Marks

Component	Marks	Requirement
Brief & research	15	Audience, purpose, keywords and category review.
Concept exploration	15	Original thumbnails and rationale.
Primary logo	20	Clear, distinctive and scalable construction.
Logo family	15	Secondary/compact variants.
Typography & colour	10	Appropriate, legible and licensed choices.
Testing	10	Small/large, mono, light/dark contexts.
Usage rules	5	Clear space, minimum size and misuse.
Handoff	10	Organised master/export files and rationale.

Course Quiz - 30 Questions

1. Define a logo.
2. Why is a logo not the whole brand?
3. What is a logo design brief?
4. Why review competitors without copying them?
5. Name four common logo types.
6. What is a wordmark?
7. What is a combination mark?
8. What is keyword mapping?
9. Why create thumbnail sketches?
10. What is shape language?
11. Why is simplicity useful in logo design?
12. What is vector construction?
13. Why should a logo be tested in one colour?
14. What role does typography play in a logo?
15. Why must font licensing be considered?
16. What is a primary logo?
17. What is a compact logo variant?
18. What is a reverse logo?
19. Define clear space.
20. What is minimum size?
21. Why should logos not be stretched?
22. What is negative space?
23. What is visual balance?
24. Why test a logo at profile-icon size?
25. Why test on light and dark backgrounds?
26. Name three common logo mistakes.
27. Why should protected logos not be traced?

28. Name four useful logo export formats or file types.

29. Why keep an editable vector master?

30. List six requirements of the final logo-system project.

Final Examination - 100 Marks

Section A - Foundations and Research (20 marks)

Explain logo purpose, briefs, research, logo types and concept development.

Section B - Form and Construction (20 marks)

Explain shape language, vector construction, simplicity, proportion and balance.

Section C - Typography and Colour (20 marks)

Explain type selection, spacing, colour systems, monochrome and reverse versions.

Section D - Logo Systems and Testing (20 marks)

Explain primary/secondary variants, clear space, minimum size and application testing.

Section E - Professional Practice (20 marks)

Explain critique, originality, trademark awareness, file preparation, usage guides and handoff.

Course Completion Outcome

After successful completion, the learner should be able to interpret a logo brief, research responsibly, generate original concepts, construct simple scalable marks, combine typography and colour appropriately, create a flexible logo family, define usage rules, test the system across realistic applications and prepare organised professional files for handoff.

Professional Practice Checklist

- Research before sketching.
- Create original concepts; never trace protected logos.
- Prefer clarity and scalability over effects.
- Test in one colour and at small size.
- Use properly licensed typography and assets.
- Create approved logo variants for different spaces.
- Document clear space and minimum size.
- Keep editable vector masters and organised exports.
- Perform appropriate trademark/name checks before real commercial adoption.
